- * **Minimal Relamping**

Westinghouse Lighting Solutions
*meets the specified foot candle levels using less
energy and fewer lamps than any other manufacturer.*

WHAT'S AN INVESTMENT IN ENERGY-EFFICIENT LIGHTING WORTH?

New facility lighting is one of the best capital investments a company can make. Look at the results of one of our more recent projects near Charlotte, N. C. A large national retailer invests \$159,000 in a new lighting system for their distribution center and realizes a total return of over \$1.5 million in just 10 years — a return any CFO would love.

Initial Investment: (lighting system cost)	\$159,000
Annual Savings: (energy costs)	\$151,000
10-Year ROI:	\$1.5 Million

The choice is not T5 or T8, the choice is which is the better investment.

SAVE UP TO 75%

On lighting energy costs without compromise.
